

GROUP 572 SCREWDRIVERS

KENNEDY Pro-Torq Screwdrivers

Chrome vanadium steel blades with magnetic tips. Fitted with a unique dual grip triangular handle which has been designed for improved user comfort,

allowing more torque to be applied. With convenient hanging hole in the handle for storage.

Crosspoint

Crosspoint screws virtually eliminate the screwdriver slippage if the correct size is used. The No.2 screwdriver would be suitable for most applications. **DIN ISO 8764.**

GROUP 572 SCREWDRIVERS

KENNEDY Electrician's Screwdrivers

Parallel tip screwdrivers with mechanic's pattern handle. Chrome vanadium blades.

Parallel Tip

Slotted head screws are the most commonly used screw. To safely drive these screws, the tip of the screwdriver should be of the same width as the slot in the screw head and fill it as well, to minimise slipping and deforming the screw head.

Offset Double-Ended Screwdrivers

Designed to give access into otherwise restricted areas. A versatile tool suitable for use in many applications.

Size	Weight each	Order Code KEN-572	Price/1 TB

1000V Dual Grip VDE Screwdrivers

A fully insulated screwdriver VDE tested up to 1000V. Professional high grip handles, magnetic tips, chrome vanadium steel blades.

Crosspoint

Crosspoint screws virtually eliminate the screwdriver slippage if the correct size is used. The No.2 driver is suitable for most applications.

Parallel Tip

Slotted head screws are the most commonly used screw. To safely drive these screws, the tip of the screwdriver should be of the same width as the slot in the screw head and fill it as well, to minimise slipping and deforming the screw head.

KENNEDY Professional Aluminium-Bronze Spark-Resistant Screwdrivers

Spark-resistant tools are used to eliminate the chances of accidental fires or explosions in potentially combustible or explosive environments. They resist the sparks that a standard tool could potentially create when striking hard surfaces. The use of spark resistant tools is essential in many industrial applications such as petroleum and chemical manufacturing, spray booth operations, the marine industry, the mining industry, the paper industries, or any location where flammable vapours or combustible residues are present. Aluminium-bronze spark-resistant safety tools are manufactured to 25HRC and offer a breaking strain of 75 - 85kgf/mm².

Spark-resistant tools must be maintained with special care. Frequent cleaning/re-dressing to remove ferrous particles or contaminants, which may impair the spark resistant properties, is essential.
