

QUALFAST Rivet Nuts

All of our rivet nuts have a clear plating which is RoHS compliant - this is now the preferred finish across all industries as there is no chromium content as is the case with zinc and yellow finish.

Steel, Low Profile Head, Splined Body

The splines on the body bite into the parent material on installation, creating an improved torque resistance compared with standard round bodied rivet nuts. The low profile head creates a high load bearing feature but only results in minimal stand off between the adjoining panels.

Steel, CSK Head, Splined Body

The splines on the body bite into the parent material on installation, creating an improved torque resistance compared with standard round bodied rivet nuts. The extra wide countersunk head provides excellent strength whilst leaving the nut flush with the material face.

Steel, Flat Head, Splined Body

The splines on the body bite into the parent material on installation, creating an improved torque resistance compared with standard round bodied rivet nuts. The large flat head makes the fixing ideal for use in high load bearing situations.

Aluminium Rivets

For all applications of blind riveting. Aluminium rivet head with steel mandrel. Medium strength, use with aluminium and where rust is a problem. Select grip based on thickness of material to be riveted.
