

**MATLOCK****Door  
Controls**

This comprehensive range of Door Controls feature varying power sized units for many different door applications. They come with a choice of architectural covers which are each available in 26 different plated or colour coated finishes. To help select the correct closer for you, each unit has a listing showing their key features, certification numbers and fire ratings. Plated arms are available on certain units only, and test certificates are available upon request.

**BS EN1154 Classification**

This standard classifies door closers using a 6 digit coding system. Each digit relates to a particular feature of the product measured against the standards performance requirements.

**Digit (1) - Category of use:**

'3' denotes the unit is for closing doors from at least 105°.

'4' denotes the unit is for closing doors from 180° open.

**Digit (2) - Durability:**

'8' successfully completed 500,000 test cycles.

**Digit (3) - Test door mass/size:**

Seven grades are identified as shown in the table below (where a closer provides a range of power sizes both the minimum and maximum sizes shall be shown):

Power size	Test door mass	Recommended door leaf width
1	20kg	750mm
2	40kg	850mm
3	60kg	950mm
4	80kg	1100mm
5	100kg	1250mm
6	120kg	1400mm
7	160kg	1600mm

**Digit (4) - Fire behaviour:**

'0' denotes the unit is **NOT** suitable for use on fire/smoke doors.

'1' denotes the unit **IS** suitable for use on fire/smoke doors.

**Digit (5) - Safety in use:**

'1' all door closer units are required to satisfy the essential requirement of safety in use.

**Digit (6) - Corrosion-resistance:**

'0' - indicates no defined corrosion-resistance,

'1' - indicates mild corrosion-resistance,

'2' - indicates a moderate level of corrosion-resistance,

'3' - indicates high corrosion-resistance,

'4' - indicates very high corrosion-resistance.

Within this section units have been tested to **BS EN1154**, with many units also having been tested to current Certified testing and CE test criteria. Therefore, the 6 digit classification is shown against each of the varying units, thus indicating their performance and grading under **BS EN1154**.

**Budget Contract Door Closer****Size 3 Mechanism 28730**

Silver finish. **CE** tested. Closing force size 3

(**EN1154**). Maximum door width 950mm.

Suitable for doors 40 - 60kg.

Adjustable latch action.

Fire tested to **BS EN1634-1**. 1 hour fire rated.

Self handing (fits to left or right hinged doors). 180° opening (retains control of door when opened 180°).

**Specification:**

**CE** 1121.

**Certifire approved:** CF600.

**Meets EN1154:** yes.

**Fire tested to EN1634:** 1½ hours.

**Power size:** 2 - 4.

**Application:** universal.

**Arm assembly:** projecting arm.

**Architectural cover:** mechanism only or 92 cover.

**Closing speed:** adjustable.

**Latch action:** adjustable.

**Stand open option:** yes.

(NOT for use on fire doors).

**PRODUCTS ARE ONLY AVAILABLE VIA YOUR DISTRIBUTOR**

This panic hardware range of emergency exit devices contains products that are certified to the European CEN standards **BS EN179 & BS EN1125** and offers a design to give optimum safety and security. All products meet with the required standards in today's market. They have an anti-thrust mechanism to protect against attack, they carry a ten year manufacturer's guarantee and are two hour fire rated. Standard sized units are suitable for doors up to 2440mm high and 1220mm wide. Special sized vertical shoots, horizontal bars, keeps and pullman catch kits are available on request.

**BS EN1125 Classification**

This is the European standard for Panic Exit Devices. This determines that a Panic device must be fitted where members of the public are present and have no prior knowledge of the exit or hardware.

**BS EN179 Classification**

This is the European standard for Emergency Exit Devices. This determines that in emergency situations occupants will have prior knowledge of the exit and panic situation is unlikely to occur. Each standard is tested and evaluated and a 9 digit code is produced.

**BS EN 1125 & BS EN 179** are harmonised under the Construction Products Directive and products must therefore carry the CE mark.

**Push Bar Panic Latch**

Suitable for public areas.  
Certified for use on fire doors.  
CE marked for safety.

**Security Hasps**

Manufactured from hardened steel with a duplex nickel plated anti-corrosive finish. The hinge pins, fixings and assembly are concealed with a folded edge for tamper protection. Supplied with fixing screws.

**Double Hinged:**

Models can be used for internal and external corner mounting.

**Triple Hinged:**

Models also allow for use on non-flush fitting (stepped) surfaces.

**8120, 8110, 8100\* & 8150\*:**

For use on standard duty and domestic applications.

**8200\* & 8160\*:**

For use on medium duty applications.

\*Supplied complete with door reinforcement plates for improved security.
