

MATLOCK

Post & Chain Barriers

The Matlock support post and chain demarcation barrier system is lightweight and sturdy. It is ideal to cordon off an area or to form a channel for queuing. Suitable for warehouses, factories, offices, leisure venues etc. Support posts, bases and chain packs sold separately.

Chain support post with cap.

Height: 910mm. **Diameter:** 50mm.

NEW

AVON

PVC Insulation Tapes

Extremely flexible with a good adhesion. For wire and cable insulation, bundling and reinforcing. Assorted colours for colour-coding cables. Flame retardant. Manufactured to **BS 4J10** (Aero) and **BS 3924**.

Roll length: 33m.

Box quantities:

19mm = 40, 25mm = 30

Thickness: 0.13mm (5mil).

Adhesion: 0.47kg/25mm, (16.5oz/1").

Tensile strength:

5.2kg/25mm (11.5lb/1").

Elongation: 150%.

Breakdown voltage: 5.5kV.

Insulation class: 80°C.

KENNEDY

Industrial Steel Wool

Protects against corrosion. Versatile - available in a choice of seven grades for industrial, household, garden and trade use. For woodwork and preparation of polished surfaces between coats use the wire wool dry. For removing paint spots - use with a white spirit, turpentine or liquid paint remover. Always wear gloves.

For household work - use with soap and water as required. Suitable for use with metallic pots and pans.

Grade	Application	Weight each	Order Code KEN-990	Price/1 TB
000 Very Fine	Fine cabinet work, dulling of varnish, polishing metals and car bodies	450g	-1010K	370.00
00 Fine	Fine use between coats of varnish and paint, polishing wooden surfaces	450g	-1030K	318.00
0 Fine	General-purpose	450g	-1050K	289.00
1 Medium	For preparation prior to painting and varnishing	450g	-1070K	308.00
2 Medium	General-purpose	450g	-1090K	308.00
3 Coarse	Removal of paint varnish, rust etc.	450g	-1110K	308.00
4 Very Coarse	For rubbing down wooden surfaces, preparation of car bodies/exterior surfaces	450g	-1130K	308.00

Effective solution that guarantees satisfactory BARRIER CONTROL in any environment

Traditional systems for controlling people traffic using standard barriers connected via a chain or belt going pole to pole are associated with the continuous problems of maintaining a safe place to work. Even expanding barriers or self-retractable barriers could break, fall down or blow away exposing people to unnecessary and unacceptable risk. The cumbersome nature of the sturdier systems also limits their usability, making them less flexible and impairs their portability. These problems are magnified in areas that have to cope with work space restrictions and hazardous working conditions such as those found in the offshore gas and oil industry. Barriers are a key requirement of the Health and Safety (Safety Signs and Signals) Regulations.

The 'Z-Barrier' system is the most innovative improvement in temporary safety barriers and provides an effective solution that

guarantees satisfactory barrier control in any work environment. 'Z-Barriers' are patent pending for the unique design that ensures barriers are prominent and remain in position, for all physical and environmental conditions.

Manufactured from a unique, reinforced PVC-based double-sided warning tape, with a high visibility day glow pattern on one face and a night reflective pattern on the other face.

These are the most visible barriers available on the market today. Quick and easy to put up, they are easily fastened to any anchor point or each other, providing a flexible barrier across any opening, around objects or in multiple directions.

Elastic properties allow 'Z-Barriers' to expand and fit between points instead of being cut to length. They are inherently shock absorbing and resist any degree of wind load to prevent damage.
