TOOL TETHERING

KENNEDY PROFESSIONAL Tool Tethers, Lanyards & Accessories

Any Tool, Tether IT!

Dropped tools are a major cause of workplace injury and fatalities – most of which could be avoided with the correct tethering and use of tools. Safe use of tools at height begins with the tool tether, which acts as a secure attachment point for lanyards and ultimately tool belts and harnesses. Utilising a patented system developed by Tool@rest, a pioneering name in the field of tethered tools, Kennedy can Retr@fit almost all new and existing hand tools with a certified, statistically fail-safe tether. This means you can enjoy industry leading tether safety without buying new tools and Retr@fitting can be carried out on your site or in a factory setting in a matter of seconds. And it doesn't stop there. Kennedy can now offer a complete solution to help prevent tools from falling, including securing of the tools-in-waiting (tools in the work belt or holster) and those in active use.
